

I wanted to send a comment on proceeding 04-233. I listen to K-LOVE, it is a valuable resource for my community. I keep up to date on local events of interest to me with their community calendar. It is also a resource for other people in my community in case they are going through the channels and come accross K-love. They might be able to hear some positive words or songs that may help them through a rough time. If K-love were replaced by a LPFM broadcaster that opportunity to affect a person or my community would be lost. K-love not only helps and services me, it has the ability and potential to help other people in my community. I urge you to dilligently consider the negative effect that an LPFM brodaster would cause to K-love, myself and ultimately the community. Please, email me if you need additional information or clarification. Thank you.
